

# Green Energy: Xcel's Windsource Program

Windsource is a voluntary subscription program which allows renters, homeowners, and businesses to easily source electricity from wind. One 100 kilowatt-hour block of renewable wind energy is enough to power all lights of a typical home for a month. An average household utilizes 6 to 10 blocks per month. For about \$5 a month, the average household can get 50-100% of its electricity from renewable energy. Through the program each month, residents and businesses select the amount of energy to purchase. Its easy to register and participate in, taking less than 5 minutes to register and your Windsource subscription is added to your Xcel Energy bill. Click [here](#) to register or call 1-800-895-4999.
