

## **MEMO**

**To** Mayor and City Council  
**From** Lindy Crawford, City Administrator  
**Date** October 11, 2016  
**Re** University of MN Bedrock Study

---

The University of MN is working with Hennepin County to update the county geologic atlas. They are requesting to drill a scientific core hole in Pleasant Park this December. The hole would be approximately 300 feet deep and six inches in diameter.

Should the City Council approve this request, staff recommends requiring the City be listed as an additional insured on the liability insurance policy as well as enter into a written agreement prior to the study taking place.

The University of MN will be in attendance to provide a brief presentation and answer questions about the bedrock study.

### **Council Action Requested**

Discuss and direct staff to draft an agreement for Council consideration.
