

Lakeview Ave Storm Sewer Replacement Project

The 2017 Construction Season is about to begin.

Peterson Companies, the project contractor, is anticipated to begin work the week of April 3, 2017. See the attached map for traffic control locations, the project detour, the project construction zone, and the area of the street where excavation will occur.

Project Schedule

The project is proposed to be completed over three weeks:

The first scheduled construction tasks are:

- Traffic control
- Tree removals
- Pavement removal
- Landscaping salvage/removal
- Storm Sewer installation beginning by the lake

Driveway Access

Property owners with driveways in the construction zone will have continued access to their driveways throughout the day and overnight. However, there may be short periods where driveway access may be limited due to specific street or utility construction activities. Property owners will be provided advance notification when access to driveways will be restricted.

- *Please observe posted detour and warning signs.*
- *Please do not park vehicles on streets under construction.*
- *Slow down and watch for uneven surfaces.*
- *Stay alert! Watch for signs, equipment, and workers.*
- *Please remind children to stay away from the construction site, equipment, and stockpiles of materials.*
- *Access through the site may change throughout the day as construction progresses, your patience is appreciated.*

Bus Service

The City will coordinate with local bus companies to determine if an alternate pick-up location is required during construction. If a new location is required, the affected residents will be notified.

Garbage/Recycling Service

Project staff will coordinate with local sanitation companies to determine if garbage or recycling collection is impacted by the project during construction. Any impacts will be worked through by project staff.

Deliveries

If you are anticipating a delivery during the construction schedule, please notify the on-site project representative of the time and date in which this will occur. The contractor and project staff will do their best to provide access as necessary.

Thank you for your patience

The project team will do its best to complete the project in a timely fashion and minimize disturbances. Please be patient and if you have questions don't hesitate, call us!
