

Lakeview Ave Storm Sewer Replacement Project Update

Project Overview

The project will relocate an existing storm sewer line that collects stormwater from the roadway and discharges it to Lake Minnetonka. The new storm sewer will be located along the north side of Lakeview Avenue in front of 35 Lakeview Ave and then within the easement along the east property line of 35 Lakeview Ave before discharging to the lake.

Project Schedule

Due to unforeseen circumstances the project has been delayed for the past few weeks.

Beginning this week one of the two Contractors working on the project will begin installing storm sewer within the easement at 35 Lakeview Ave. During this time there will be intermittent road closures as the storm sewer pipe is directionally drilled towards the lake. This phase of the project is anticipated to take approximately one week to complete.

Beginning the week of June 5th another Contractor will come in to install the remaining storm sewer within the roadway and complete the project by the end of June.

Access During the Project

The traffic control and detours that have been up for the past several weeks will remain onsite to direct traffic during construction. The traffic control layout is expected to change as the project progresses into different phases. Please stay aware of these changes and be prepared to take alternate routes to your home. The construction team will be there to assist you with navigating through and around the construction zone.

Garbage/Recycling Service

Project staff will coordinate with local sanitation companies to ensure that garbage and recycling service is not impacted by the project. Continue to place your containers in their usual locations and the construction staff will move them as necessary to facilitate pickup. At the end of the day they will return the containers to your property.

Mail Service & Deliveries

Postal mail service will continue as normal. If you are anticipating a delivery during the construction schedule, please notify the project manager of the time and date in which this will occur. The Contractor and project staff will do their best to provide access so the delivery can be made.

HELP US MAKE THIS A SAFE AND SUCCESSFUL PROJECT:

- Please observe posted detour and warning signs.
- Please do not park vehicles on streets under construction.
- Slow down and watch for uneven surfaces.
- Stay alert! Watch for signs, equipment, and workers.
- Please remind children to stay away from the construction site, equipment, and stockpiles of materials.
- Access through the site may change throughout the day as construction progresses
